DON'T LIKE DIGGING OUT THOSE OLD CONCRETE POST FOOTINGS?

AT LAST a quick and easy solution to remove all kinds of post complete with any concrete footing.

Look at the slides on the left , there is not a spade in sight and all done in under two minutes, thanks to the new Postpuller.

We have developed a range of machines that effortlessly remove all kinds of posts with concrete footings up to 60cm wide. So no need for breakers, spades or iron bars. Just wheel the Postpuller into position - safe and simple!

The Patent Pending and EU reg. design boasts an unrivalled 4 Tonnes of pulling force - more than a match for most posts.

No more back breaking digging up of footings, leaving a huge hole to fill, simply pull the old post out and put a new one in the hole.
